

Bleed Area

Safe Zone

A diagram illustrating the relationship between a bleed area and a safe zone. A large red rectangular border represents the bleed area, which is the outermost edge of the page. Inside this red border, a smaller green rectangular border represents the safe zone, which is the area where content should be placed to avoid being cut off. The text 'Bleed Area' is positioned at the top left of the red border, and 'Safe Zone' is positioned at the top left of the green border.
